Our Stock

The vehicles in our stock are procured through our network of partners, domestic used car dealers mainly in the Tokyo area and individual car owners. We are therefore able to provide a range of high-quality vehicles at low prices. Although the number and range of vehicles in our stock are currently limited, our network is expanding day by day and will soon be large enough to meet client demand.

We are also affiliated to Trade Carview, the biggest online network of car dealers in Japan, and registered as a Trade Carview Export Company. This means we are able to deal in all of the 6,000+ vehicles available (referred to as B2B Stock) through their network of more than 2,000 domestic used car dealers. (For more information on B2B, please see the [Trade Carview](#) website.)

All information on our stock mentioned above appears on the our Stock page that links to our page on the Trade Carview website. You can see our price for each vehicle on that page, which shows the FOB price based on the PCC (Pure Car Carrier) rate.

Please note that when buying vehicle(s) from our stock, in addition to the FOB price, the buyer is required to pay for other costs such as ocean freight from Japan to the country of export and insurance on the shipment (if necessary). In addition, the FOB price is not applicable for vehicles shipped by container.
